

Graphite Prints

Materials: pencil, transparent tape

1. Hold the pencil at an angle on paper and fill the box on the right with graphite.
2. Roll the tip of one finger over the shiny graphite, making one or two passes. Good technique demands including the entire fingertip, edge to edge and down to the area of the first joint. Keeping the paper at the edge of the table will make this easier.
3. Pull 2 - 3 inches of tape, while only touching the ends and keeping the sticky side up.
4. Roll your graphite-covered fingertip onto the tape.
5. Carefully place your fingerprint in the correct box on the card below.
